# NIKESH MANDAL

**Software Developer | Full-Stack Python Engineer | Backend & API Development**

nikeshmandal.lnj@gmail.com | +91-7257918489 | github.com/Nikesh9987

## PROFESSIONAL SUMMARY

Full-stack Software Developer and MCA graduate who has independently designed, built, and delivered complete applications for paying clients — including a Python-based log analysis tool and a forensic browser investigation dashboard. Comfortable working across the stack: backend logic, REST API design, data processing, and front-end UI delivery. Strong fundamentals in JavaScript, SQL, and Git, with current hands-on AI/LLM data operations experience. Looking to apply a generalist, ship-it engineering mindset to a small, fast-moving development team.

## CORE COMPETENCIES

- Full-Stack Application Development — Python, Django, JavaScript, HTML/CSS
- REST API Design — Authentication, Data Validation, Structured Responses
- SQL — Querying, Data Modeling, Relational Database Fundamentals
- Git / GitHub — Version Control, Pull Requests, Code Review
- End-to-End Project Ownership — From Spec to Client Delivery
- Debugging & Performance Optimization for Real-World Client Tools

## TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: Django, REST APIs, JSON, CSV Processing

Tools: Git, GitHub, Kali Linux, Wireshark, Burp Suite

Currently Learning / Exposure: Modern frontend frameworks and CI/CD fundamentals (actively building toward team stack needs)

## PROFESSIONAL EXPERIENCE

**Analyst — AI/LLM** | *Innodata (Remote)* | Jan 2026 – Jun 2026

- Validate and analyze AI/LLM model outputs, ensuring data quality for production-grade training workflows.
- Process and categorize large datasets, applying structured logic and attention to detail similar to backend data validation work.
- Collaborate with QA and engineering-adjacent teams to identify edge cases and resolve issues systematically.

**Cybersecurity Analyst Intern** | *Virtual Cyber Labs, Delhi* | Jul 2025 – Dec 2025

- Used Wireshark and Metasploit to analyze network behavior and identify vulnerabilities, building a strong debugging and root-cause mindset.

**System Operations Analyst (EDI)** | *Vensure – Epay, Noida* | Sep 2024 – Apr 2025

- Built and maintained custom data integration feeds, working directly with structured data formats and schema-level changes for client systems.
- Automated reporting scripts to monitor data pipeline health, applying programming logic to real operational problems.

## FREELANCE PROJECTS (Self-Initiated, Client-Delivered)

**Log Extraction & Analysis Tool** — *Python · REST APIs · JSON · CSV · Report Generation*

- Independently architected and shipped a complete desktop/web log analysis application for a paying client — end to end, from spec to delivery.
- Built the backend API layer, implemented filtering/categorization logic, and designed the UI for fast time-to-insight.
- Reduced client investigation time by automating what was previously a manual review process.

**Browser Extraction & Investigation Dashboard** — *Python · HTML · Data Visualization*

- Built a full application independently — data extraction backend, HTML-based interactive dashboard, and reporting pipeline — delivered directly to a client.
- Made UX and performance decisions independently, balancing investigator usability with processing speed.

**E-Commerce Clothing Store** — *Django · JavaScript · HTML · CSS*

- Designed and launched a full-stack e-commerce web application end-to-end, covering both backend logic and front-end UX.
- GitHub: github.com/Nikesh9987/ecommerce-clothing-store-second

**Stock Market Prediction System** — *Python · Django · Machine Learning · Yahoo Finance API*

- Built a full-stack ML web app from scratch, including data ingestion from an external API, model logic, and a Django-served front end.

## EDUCATION

**Master of Computer Applications (MCA) | Amity University, UP | CGPA: 8.45 | 2022 – 2024**

Bachelor of Computer Science (B.Sc. CS) | Rizvi College, Mumbai | CGPA: 7.91 | 2019 – 2022

## CERTIFICATIONS

- Java Collections Framework (Generics, Stream API, Concurrent Collections) — Udemy (May 2024)
- Introduction to Ethical Hacking — Great Learning (Oct – Nov 2023)
- Networking Essentials — Cisco Networking Academy (Oct 2023)

## ATS KEYWORDS

Software Developer, Full-Stack Developer, Python, Django, JavaScript, REST API, SQL, Git, GitHub, Backend Development, Data Validation, API Design, Web Application Development, Client Delivery, Debugging, Code Review, Self-Initiated Projects, Fresher, Entry-Level Developer
